EX1-000L

From culinary masterpieces to everyday Caesar salads—it's packaging that highlights food while giving it the feel-good quality from being produced from sustainable materials. Placon's recycled thermoformed PET trays and lids from post-consumer bottles and thermoforms are designed to impart a higher-end feel, without the higher-end cost, with crystal clear clarity that increases impulse purchases.

- Envisions packaging is easy to stack and is available in both clear and black, in shallow and deep configurations to fit a variety of foods.

- Keep food fresher longer with the deep tray base featuring an elegant and functional raised grid pattern that keeps product from sliding while allowing liquids to drain away from food.

- Our smooth shallow base is perfect for wraps, baked goods and more, with a perimeter channel that separates liquids from food extending product freshness.

- A smart lid design allows for easy opening and closing with an inside lid seal that provides a nice, tight snap closure for high leak resistance.

- Contemporary packaging creates instant shelf impact with a sleek lid and base geometry with no protruding tabs. Smooth lid surfaces allow for easy label application.

- Clear, high dome lids provide large angled viewing windows to fresh-looking food, giving consumers unobstructed viewing—no matter how it's displayed.

- Make your brand the first and last thing they remember with custom embossing on lids or bases.

The modern grid pattern on the deep base allows liquids to drain away from food.

ecostar®
recycle | replastic | results

Envisions is just one product in Placon's food packaging line containing EcoStar® food-grade recycled PET with up to 100% post-consumer recycled content.

Placon is Your Solution for Food Packaging.

For virtually any retail food environment—supermarkets, delis, quick marts, restaurants, cafeterias, food carts and beyond—Placon provides thermoform and injection molded packaging products that deliver superior performance. Quality designs, secure seals and exceptional clarity all play a role in our industry-leading containers. Polypropylene (PP) and PET options mean our packaging can accommodate virtually any food product, use and environment.

And, our EcoStar® food-grade recycled PET (with up to 100% post-consumer recycled content) allows you to market your products while showing consumers your commitment to sustainability.
